## MATT ACRYLIC SHEET

ELEGANT LIGHT DIFFUSION.  
SUPERIOR PERFORMANCE.

ELEGANT LIGHT  
DIFFUSION

FROSTED GLASS  
ALTERNATIVE

MATTE ONE SIDE /  
GLOSSY ONE SIDE

Our Frosted Colorless Acrylic Sheet offers a luxurious velvet-matte finish that diffuses light while maintaining excellent brightness. Often chosen as a lightweight alternative to frosted glass, it adds a modern, understated look to retail fixtures, cabinetry, lighting, and privacy screens.

Because the matte texture softens reflections and fingerprints, it's ideal for hands-on displays or illuminated projects where glow and glare control matter.

### WHY CUSTOMERS CHOOSE P95 FROSTED PLEXIGLASS

Soft, uniform diffusion with up to  
92% light transmission

Elegant frosted surface on one side,  
glossy on the other

Reduces glare and blurs objects  
without blocking light

Easily machined, cut, laser-etched,  
bent, and fabricated

Great for photography and signage  
where reflections must be minimized

### BEST FOR
